

Cloudify Premium™

Automated Orchestration for Enterprise Applications on the Cloud

Automate your cloud applications and DevOps processes with Cloudify Premium. Cloudify's software platform provides automated deployment, monitoring, management and scaling of complex, multi-tier applications on the cloud. Thousands of organizations across 40 countries leverage the Cloudify platform to automate and orchestrate their applications on the cloud.

Cloudify Premium

Cloudify Premium makes it even easier for enterprises to automate their cloud orchestration. With increased support and enhanced features, Cloudify Premium lets you take your cloud orchestration to the next level.

The package comes with a variety of enhanced features and increased support that are unique to Cloudify Premium:

Full-Featured Web Interface

With additional topology views and improved progress detection, we've made it even easier to monitor and manage your apps with the enhanced web UI. The new interface provides a variety of tools, such as application topologies, workflow progress tracking, events and logs queries and more.

Premium Plugins

We know you have your favorite DevOps tools and we would never ask you to part with them. Cloudify Premium integrates with a variety of tools through plug-in packages – some of which come built right into the core. Additional packages are available for purchase.

Enterprise-Grade Support

You've got questions, we've got answers. Get the support you need 24/7 through online and hotline support.

XAP Blueprint

For XAP users, this blueprint allows you to manage any size XAP application and use Cloudify to automate and manage your XAP deployment on and off the cloud.

Blueprint Catalog

The blueprint catalog allows you to use any git repo as a catalog for your Cloudify blueprints, and allows users to graphically view, deploy and run these blueprints.

Free Upgrades and Patches

Keep up with new versions through easy upgrades, and rest assured that you will get any patch you need with our issue fix and patch SLA.

Multi-Cloud Manager

With Cloudify, you will not be locked in to one type of cloud or one type of infrastructure. Manage deployments across multiple cloud environments.

Advanced Blueprints

We will provide you with blueprints for popular commercial and big data platforms that cater to your needs so that you won't need to re-invent the wheel.

Pricing

The cost of Cloudify Premium is based on the number of nodes and support requirements of your organization, as well as any additional plug-ins you may wish to include in the package. We will work with you to help you assess your needs and find a plan that is right for you.
